

Setting Up Your Set Top Box

This set up guide is prepared for a TV set located in Victoria using RCA connections. The general principles apply to other locations and methods of connection (eg. using a SCART connection in NSW), please make selections appropriate to your own conditions.

Pre set-up instructions:

- a. Make sure you have a working connection between the Set Top Box and your TV. Follow the guide to [connect your STB to your Tv](#) if you have not connected your unit yet.
- b. Make sure you have placed the batteries for your remote control as per instructions before attempting to operate it
- c. **Turn on** the STB and the TV
- d. Go into your TV's AV channel (AV1, AV2 etc.) till you come across the STB channel

You should come across the screen below following the Wintel logo:

1. Choose your language

| | |
|---------------|---------|
| OSD Language: | English |
| | |
| | |

Press **OK** on your remote to confirm your language selection

2. Choose your Country

Basic Settings > Please select your location

| |
|----------------|
| Deutschland |
| United Kingdom |
| Australia |
| <other> |

Select **Australia** in the list of countries and press **OK** to confirm

3. Choose your State

Basic Settings > Please select your location

| |
|--------------------|
| New South Wales |
| Northern Territory |
| Queensland |
| South Australia |
| Tasmania |
| Victoria |
| Western Australia |
| <other> |

Locate the state you reside and press **OK** to confirm.

(If you are living in **ACT** or are within the range of **Como** then you will have to choose **<other>**)

4. Search Channels

Basic Settings > Channel List

Search Channels

Keep empty List

Press **OK** while **Search Channels** is highlighted.

5. Transponder Screen

Search Channels > Transponder

| Channel | Signal Strength |
|---------------------|-----------------|
| 198.5 MHz | |
| Running Services: ? | |
| DVB Services: ? TV | |
| ? Radio | |
| Network table: Yes | |
| Totals | |
| Transponders: 14 | |
| TV: 7 Radio: 3 | |
| | 0.0 |
| | ■ TPS |

You should get a screen similar to the image above.

The unit will scan for channels for approximately **2-3 minutes** depending on the signal strength.

Do **not** remove connections or turn off the unit while it is scanning.

Once complete, the STB will automatically switch to the first channel.

From here on you can browse the channels via the **P+** / **P-** buttons on your remote.

Note: There is a likely chance that your STB will start up with Channel 7's High Definition broadcast. If your TV set is not HD capable, then the picture will appear to be frozen and breaking. This is not an error with the reception or the STB, just incompatible modes with the broadcast and your TV. Switching to the Standard digital broadcast is all you'll have to do.
