Weight (Net)	2.435kg (inc. stand)
Weight (Gross)	3.5kg

Wintal's LED-LCD TV Warranty Options

Once upon a time, TVs were exceedingly large, fragile and heavy. The warranty process was long and complex. This is no longer the case, meaning that warranties on all your Wintal products are great value. We offer a free call number, where you can discuss any issues or queries with a member of staff based here in Australia. We also have a single service department based in Melbourne which means lots of spare parts, technicians that know the product and faster turnaround times.

Our entire range of LED14-15 Series TVs all come with a standard 12 Month Warranty—but for your peace of mind, optional **+2 Year** and **+4 Year** Extended Warranties are available.

We seek to provide maximum value!

Due to our on-site service department, we don't have to outsource repairs; reducing the handling and shipping of your product, resulting in less paper-work—meaning less expense for us, and therefore less cost to you!

Back to base

Our warranties are specially designed so that you can rest easy. Once you drop off or send the unit back to us, we'll follow a thorough and efficient process. Once complete, we'll send the unit back to you.

Our technicians are very familiar with the product. Their number one priority is warranty repairs. They will maintain

the highest quality standards possible to ensure that you keep buying Wintal. And since all the technicians work for us, you have the security of a company that has over 75 years trading history.

Return method is up to you!

If we can't fix the issue over the phone, our only requirement is that you get your TV safely back to us or the authorized reseller at your own cost. This allows you to bring your TV in to our service centre, ship it by express courier if that's what you need, or, for the more economically minded with no time pressures, opt for a cheaper transport method. We'll service your TV and send it back to you!
