

BMR3X APT-X BLUETOOTH MUSIC RECEIVER

Lose the wires without compromising audio quality

Simply pair your Bluetooth enabled device—such as your smart phone, iPad, Android tablet—and connect the BMR3X to your AV receiver, multimedia speakers and more. With our inclusion of the highly renowned apt-X codec, the BMR3X allows you to enjoy wireless Bluetooth audio quality indistinguishable from wired, with an impressive dynamic range.

Benefits of apt-X:

- Audio bandwidth matching CD performance (16-bit, 44.1kHz)
- Low audio coding delay—minimizes latency and 'lip-sync' issues
- Non destructive transcoding—no dueling effects with other algorithms
- Backward Compatibility—when apt-X is not available target device will pair down to SBC
- Compression ratio of 4:1 and data rates up to 352kbps

Please note: Your source device must also have the apt-X codec. Please check your device user manual and specifications to be sure. If your device does not have apt-X, the BMR3X will still work, utilising the SBC codec.

Features

- apt-X codec for exceptionally high CD quality wireless performance
- Dual output
S/PDIF Optical output: For pure digital audio connection, ideal for connecting to AV Receivers
- 3.5mm stereo output:
For connection to any speaker system, media player and more with a standard AUX input
- Auto-Pairing
- Once the BMR3X establishes a Bluetooth connection with a device, it will remember and auto-connect when that device is in range
- Multi-Device Support
The BMR3X will remember and connect up to 8 devices

Brand: PRO2

Model: BMR3X

Code: 39894385

Warranty: 12 months

Package contents:

- 1x Receiver
- 1x power supply (5VDC / 0.6A)
- 3.5mm plug to plug stereo lead
- 3.5mm socket to 2x RCA stereo lead
- User manual

Digital and Analogue outputs for maximum flexibility and audio output quality!
