

QUICK GUIDE

1. Connect the power supply to the WBD11
2. Connect the RCA output to your audio device
3. The WBD11's blue LED will be flashing  indicating that it is ready to accept incoming connections
4. Turn on Bluetooth on your source device (phone, iPad, Android Tablet, PC etc.)
5. Search for nearby Bluetooth devices and wait till you see "Wintal WBD11" come up on screen
6. Select it to pair it with your device
7. Accept any confirmations that pop up.
8. Once a connection has been established successfully, the blue LED on the WBD11 will stop flashing and remain on . You will also hear a double-beep from your speaker
9. You may now start enjoying wireless music from your Bluetooth enabled device

FAQ.

Switching to another bluetooth device

To switch from one Bluetooth source to another, you will first need to disconnect the Bluetooth connection, wait for the WBD11 led to start flashing and connect your second bluetooth device.

Call privacy

The WBD11 will not act as a headset when your phone receives an incoming call. As soon as you hang up the call, it will resume to playback music.
